Dear Student and Family,

A third quarter report card for your child is included in today's brown envelope. Please take the time to look over the report card with your child discussing strengths and setting goals for the last quarter.

As you look at my attachments, look for areas where I note that your child is "developing" or "could work on" a specific skill. We will review all these skills the rest of the year, and these areas would be good skills to focus on for goals.

Also keep in mind that this quarter's math grade reflects some difficult concepts. Specifically multiplication, division, and fractions. While we are just introducing these, second graders should be developing skills and starting to understand these concepts.

Lastly, a large portion of the Social Studies grade this quarter is based on the Fort Collins History project.
